# One Malaysia Printing!

Converting Low Res Image in Corel Draw

(Note:This conversion won't maximise the quality of your artwork if you already design it using low res images at the first place,however,by converting it to hi res image(300dpi),you can ensure you get the maximum quality from the low res image you use.So please make sure you design your artwork using high resolution image to get the maximum quality(minimum 300dpi).)

1.Check your image resolution by looking at the bottom .

2.Select the image to convert.Go to Bitmap > Convert to Bitmap

3.Change the resolution of the image to 300dpi and CMYK colour model.
