

One Malaysia Printing!

Converting Low Res Image in Adobe Illustrator

(Note: This conversion won't maximise the quality of your artwork if you already design it using low res images at the first place, however, by converting it to hi res image, you can ensure you get the maximum resolution from the low res image you use. So please make sure you design your artwork using high resolution image.)

1. Open your artwork.

2. Select the picture to be converted and go to Object > Rasterize.

One Malaysia Printing!

3. Change the resolution of the image to 300dpi and CMYK colour model.
